### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9 and 11-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Ma (6,112,923). Ma discloses, in figs. 13-15, a container comprising a retention structure 250 and a rotational locking structure 244, and a plastic closure comprising a tamper evident band 218 having J-hook retention member 224 with a plurality of pleated retaining elements 226 (also see col. 5, lines 50-57). The retaining element comprises a leading edge 227 and a trailing edge 228. The trailing edge has an abutment surface being parallel to a radius of the closure (see fig.13).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ma. Although Ma does not disclose the closure being made from high density

polyethylene, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the Ma closure form material as claimed, since it has been held to be within the general skill of a worker in the art to select a known material as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

### ***Response to Arguments***

5. Applicant's arguments filed 12/15/05 have been fully considered but they are not persuasive.

Applicant argues that Ma does not disclose the J-hook retention members having a plurality of pleated retaining elements because the retaining element (J-hook retention members) in the Ma patent are flaps/wedges that do not fold as a pleated retaining elements. However, that is not found convincing because Mar discloses, col. 5, lines 50-57, "inwardly directed pleats could be provided in combination with ramp elements". See a prior art of Kelly (5,400,913) which teaches, in figs. 1 and 2, J-hook retention members being flaps/wedges that fold as a pleated retaining elements.

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3754

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
